

The Power of Barcode Scanning

IWI's Barcode Scanning Inventory Module for Sage 300

Introducing Barcode Scanning for Sage 300. IWI's Barcode Scanning Inventory Module is a web based solution designed to streamline your inventory operations by automating your current time consuming manual processes thus increasing employee performance along with reducing human errors in a cost effective way.

The Barcode Scanning Inventory Module for Sage 300 (formerly Sage Accpac) is Bluetooth enabled, eliminating the need for the expensive hardware commonly associated with a barcode inventory management solution. All you need to experience the benefits of the solution is a Bluetooth barcode scanner. This scanner will work with your Bluetooth compatible smartphone or tablet to scan items and transfer data seamlessly to Sage 300. It really is that simple!

Features & Benefits

Our Barcode Scanning Inventory Module for Sage 300 packs a lot of features into one solution. Not only do you receive wireless barcode scanning capabilities and mobile software access, but you also get the chance to streamline complicated inventory processes and automate every step of inventory management.

If you are looking to automate your inventory management and improve your accuracy and productivity, this solution was designed for you. Designed to provide small businesses with barcoding technology, this solution can transform your inventory processes.

The following features and benefits are just a sample of what you will receive from IWI Consulting's Barcode Scanning Inventory Module for Sage 300:

- **Purchase Order Receipt** - Match received shipment to the original PO
- **Direct Receipt** - Allows you to direct items to the proper warehouse location upon receipt

- **Sales Order Shipping** - Match shipped items to pick sheet, reducing picking errors
- **Inventory Count** - Accurately count inventory at anytime and receive real-time updates in your ERP system
- **Stock Transfer** - Allows you to scan and transfer items between your company locations
- **Serial & Lot Tracking** - Assign to specific lot and serial numbers

All of this for less than the cost of a cup of coffee per day!
